1 Warnings and Safety information

This is a navigation system that helps you find your way to your destination with your connected GPS receiver. It does not transmit your GPS position; others cannot track you.
It is important that you look at the display only when it is safe to do so. If you are the driver of the vehicle, we recommend that you operate it before you start your journey.
Plan the route before your departure and stop if you need to change something in the route.
You must obey the traffic signs and follow the road geometry. If you deviate from the route that recommended, it changes the instructions accordingly.
Never place mobile devices where it obstructs the driver's view, where it is in the deployment zone of an airbag or where it might cause injuries in an accident.
The satellite signals can be received by the GPS Navigation System only when it is in the open air or besides the windows through which the sky can be seen.
Please confirm the current satellite state of the CPS Navigation System which can locate accurately only after more than three satellites are received.

2 Getting started with SUNAVI

1. Important Notes:

A Important Notes will occur firstly when software open for the aim of reminding the drivers that the GPS Navigation System is an auxiliary tools providing assistance for the driving, yet not a management tools controlling the driving. If there is any discrepancy between the system and the actual roads situations, the driving shall be conducted according to the actual situations. The illegal behaviors and unsafe conducts shall not be occurred in the utilization of the system.

2. Map screen

Button	Description
	For zooming in the map.
	For zooming out the map.
	The option for the present site, the user can choose “Entry Main Menu”, “Set as Destination”, “Back To your Position”, “Add to Favorites” , “Set as Start ”, “Find POI Around me” Or “Route list ”, “Simulate ”,”Cancel Route”, ”Recalculation” as indicated
	Tap it to switch the choices whether the feature is enables.
	Tile up
	Tile down
	Return
Icon	Description
	GPS OK
	GPS OFF
	North Arrow (the red point is for the North), time information, GPS position quality and battery staus. Stroke the icon for displaying the present satellite state
	For expected to reach the destinations in time and distance
	Turn right to xx road after xx m
	If the distance to the road junction or the turning curve is less than 1KM,rhe icon shall appear.
	Junctions enlarge model. Turn right after xxM
	Junctions enlarge model. Turn left after xxM

	Speed information

3. Option Menu

Screen List	Name	Description
Option	Main Menu	Main Menu
	Back To Your Position	
	Nearby POI	
	Set as Destination	A new route is calculated with the cursor as the destination. The previous route is deleted.
	Set as Start	The cursor becomes the start point of the route. This means that route will not be started from the current GPS position, and Automatic OFF-route Recalculation needs to be turned off to keep the start point the selected one.
	History	The locations visited can be find
	Favorites	The favorite location can be find
	Add To Favorites	The location of the cursor is added to the list of frequently visited destinations, the so called favorites. You can give a name for the favourite.
	Route List	Routes Showing: the names for all the taken roads, direction of the roads junctions and the distance between the starting point and a certain road junction shall be Displayed
	Simulate	Driving the simulated on the planned navigation routes
	Cancel Route	The planned routes will not be displayed on the map
	Recalculation	The routes shall be recalculation
	Cancel Simulate	Stops the running simulation
Main Menu	Find	Selecting the destination(for example a POI)
	Setting	System Settings
	GPS	GPS Satellite status
	Exit	
Find	Find Intersection	Method to find the location
	Find POI	Method to find the location
	Nearby POI	Method to find the location
Settings	Display	The user will enter into the menu relative with the display of the maps.
	Voice	
	Device	
	Navigation	
	Restore	

	About	
Display	Map Orientation	
	Smart Zoom	Navi can automatically rotate, scale and tilt the map and give you the optimal view.
	Show Intersection	
	POI Display	The user can choose to show the POI or not on the map
Voice	Straight Hint	Refers to the frequency of the sound system to remind the driver about the straight driving information when in the straight-line driving
Device	Time Format	
	Back Lighted	The principle of backlight
	Touch Panel Tone	
	Sound Mute	
	Volume Level	
Navigation	Speed when Simulate	The user can adjust the speed in the simulated navigation. In terms of the simulated speed, its set range is X1(the lowest)to X5(the highest)
	Skip Freeway When Simulate	

4. Selecting the destination of a route

It offers you several ways of choosing your destination and via points

1) Selecting the cursor as the destination

- Location your destination on the map: move and scale the map as needed.
- Tap the location that you want to selected as your destination.
- The map appears with the selected point in the middle.
- Tap to open the cursor menu, selecting “set as destination”. The route is then automatically calculated, and you can start navigating.

∗ If you know that you will use a destination later, when the cursor menu appears, add it to favorites. The cursor menu returns automatically with the same point, now you can use it as a route point.

2) Find a POI with full words or a key words

If you know at least a part of the address, it is the quickest way to select the destination of the route.

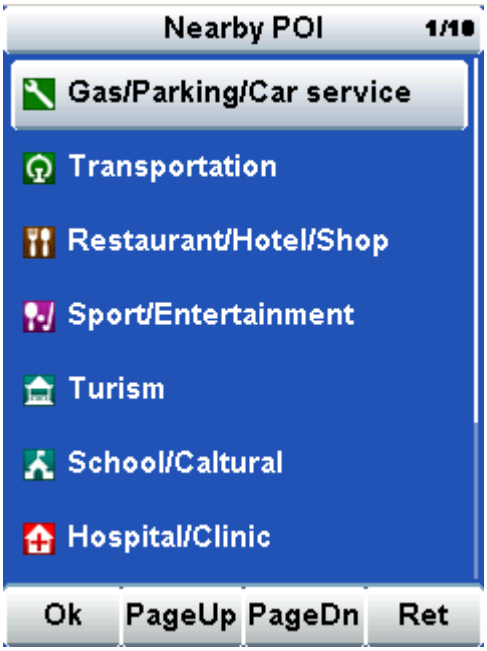
- Tap to open the cursor menu, selecting “Entry Main Menu ”
- Selecting “Find”, then “Find POI” and enter into of “City Select”
- After entering a couple of characters, the names that match the string appear in a list.
- Pick the settlement from the list. Tap

3) Find a Intersection with full words or a key words

- Tap to open the cursor menu, selecting “Entry Main Menu ”
- Selecting “Find”, then “Find Intersection” and enter into of “City Select”
- After entering a couple of characters, the names that match the string appear in a list.
- Pick the street from the list. And all the roads crossed with that is listed.
- Pick out the right intersection.
- Tap to open the cursor menu, selecting “set as destination ”

4) Find a POI around yourself

- Tap to open the cursor menu, selecting “Nearby POT ” and tap
- Select the facilities category , like “Building” 、” Industry ” 、” Transportation” , then a list of all the POI around the present site shall be provided by the system.
- Pick out the right one.
- Tap , and the map appears with the selected point in the middle.
- Tap , and selecting “set as destination”. The route is then automatically calculated,



5) Selecting the destination from your favorites

In the map, you can record some location into address book by choose “Add to Favorite”. Then you can use the location in the favorite record.

- Tap to open the cursor menu, selecting “ Favorites” and tap
- Pick out the right one
- Tap to open the cursor menu, selecting “set as destination”. The route is then automatically calculated,
- The following options shall be displayed if the user chooses :

“Go”, the location is set as the destination
“View”, the location shall be shown on the map
“Delete”, deleting the address record
“Delete all”, deleting all the address records
“Rename”, renaming the address

6) Selecting the destination from the History

The destinations that you have set earlier appear in “History”, you can use it as destination.

5. Setting

Choosing “setting”, you can enter into the options designed by the system for setting GPS Navigation System.

1) Language

You can select different language, such as English, Han, Portugal, and Spanish.

2) Display

- Map Orientation

Two moods as “North-up” or “Driving Direction” can be chosen. You can have your own specific setup.
In North-up mode the map is rotated so its top always faced North. See also: Driving Direction map orientation.

- Smart Zoom

The scale of the map in the navigation can be adjusted automatically with the function on.

- Show Intersection

3) Device

- Back Lighted

You can set the back lighted level as “1 min”、”3 min” 、”5 min”、”10 min”、”Always on” and “By phone setup”.

- Touch Panel Tone
- Sound Mute

  Any sound will be off under this function.
- Volume Level

4) Navigation

- Speed When simulate

The user can adjust the speed in the simulated navigation. In terms of the simulated speed, its set range is X1(the lowest)to X5(the highest)

- Skip Freeway When Simulate

5) Restore

Choose “Restore”, the system will restore all the setup options to the ex-factory state.
